

NIST FISMA Implementation Phase II

**Patricia Toth
NIST**

Abstract:

The FISMA Phase II Project will develop and implement a harmonized standards-based organizational credentialing program, supported by tools (automated where possible), and training for public and private sector entities to demonstrate core competencies for offering security services to federal agencies.

Biography:

Pat is a Computer Scientist in the Computer Security Division at NIST. Pat has worked on numerous documents and projects during her 17 years at NIST including the Common Criteria Evaluation Program and serving as Program Chair for the National Computer Security Conference. Most recently she has worked with the FISMA team to produce the family of FISMA documents and the FISMA Phase II Credentialing Program. She has a BS in Computer Science and Math from the State University of New York Maritime College.
